SOFTWARE DEVELOPER

EXPERIENCE

Software Developer
Wiredin Ltd   **April 2025 to Now**
Onsite

- I'm currently working on the Murakoze App, a platform designed to improve user engagement and service experience across both mobile and web applications.
- Design & developing and maintaining core features, optimizing performance, and ensuring seamless interaction between the app's frontend and backend.
- collaborate closely with designers to translate UI/UX concepts into functional, high-quality code, and work alongside senior developers to implement scalable, maintainable solutions.

Software Engineer
CB-LINK.Ltd   **July 2023 to January 2024**
Hybrid

- Developed healthcare management application using React and Progressive web app, focusing on the user experience and system performance.
- Collaborated with cross-functional teams to deliver features that improve workflow efficiency.
- Participated in code reviews and maintained high code quality standard throughout the development lifecycle

Front-End Developer
KLAB Techup skills   **September 2023 to March 2024**
Onsite

- Worked on smart car parking system with both web and mobile applications, for managing space availability and reservations
- Collaborated with backend teams to integrate RESTful APIs for live parking availability updates and payments processing
- Coordinated with design and backend teams to ensure seamless user experience across both platforms.

Intern Web developer
TRUST Engineering Ltd   **April 2022 to September 2022**

- Built and maintained responsive websites. Using Next,js, typescript, and javascript.

- Gained hands-on experience with networking concepts to support web performance and user accessibility.

EDUCATION

Bachelor of Software Engineering
